

FROM THE PRINCIPAL

Dear Parents and Community Members,

This year's state report card, issued by the Oregon Department of Education offers a comprehensive view of McNary High School's academic strengths as well as areas of continued focus. In the 2014-15 school year, McNary along with all other Oregon high schools participated for the first time in the Smarter Balanced Exam that measures student proficiencies in the Common Core State Standards. These new standards have been designed with the goal of improving student college and career preparedness. While reaching performance levels in English Language Arts and Mathematics that outperformed district and state averages, we recognize there is much work to be done to support continued academic excellence. Our three instructional priorities as a staff are to effectively use teacher collaborative teams to commonly plan and analyze student results, to have targeted professional development that applies the latest and most

effective instructional strategies, and to design unit plans that contain relevant and impactful lessons for our students. We strive to meet the diverse needs of all of our students and will explore additional ways to make our school a welcoming and inspiring place to learn and grow. We will continue efforts to engage the parents of historically underserved races and ethnicities because these services and partnerships will help lead to improved student achievement for all. Parents can help by monitoring their student's homework and attendance, volunteering at school, supporting extra-curricular activities, volunteering and maintaining regular communication with their child's teachers. Please show your student that you value their school work and activities.

Thank you,
Principal | Erik Jespersen

OVERALL SCHOOL RATING HOW ARE STUDENTS AT THIS SCHOOL PERFORMING COMPARED TO THOSE AT OTHER SCHOOLS?

The overall school rating is intended to summarize this school's particular successes and challenges. It is based on a combination of up to five factors. Three of these factors come from standardized test scores in reading and math: student achievement, student growth, and the growth of underserved subgroups. Please note that this rating is based mainly on high-stakes testing and, accordingly, doesn't represent a complete view of your school's performance. Other aspects of this report card are designed to put this rating in the proper context.

The U. S. Department of Education has given the State of Oregon approval to temporarily suspend the assignment of school ratings during the transition from the Oregon Assessment of Knowledge and Skills (OAKS) to the new college and career readiness assessments. Schools will not receive an overall school rating on this report card and will receive a new overall school rating on the 2015-16 school report cards.
